DVJ VISION RELEASES VISUALS FOR DVJS

Nov 14, 2006 7:40 PM

Club Visuals is a collection of live video and computer animation that moves to a steady beat of 128 bpm. These exclusive clips are beat-matched and mixed just like a DJ set. You can play them one by one or play the whole DVD, which auto loops back to the beginning. Far more than a collection of loops, every clip evolves and tells a story the way a record does. A click-track makes synchronizing audio and video easier than ever.

Club Visuals contains six clips and is 42 minutes long. The DVD is available in NTSC and PAL for \$34.99. *Club Visuals* is the first release of DVJ Vision. *Club Visuals 2* and other DVDs for DVJs are in the works.
